Subject: Plant Ag + AMR workshop: draft agenda v3 for review
Attachments: AMR Draft agenda_V3.1.docx; Plant ag & AMR_meeting 1 intro slides.pdf

Dear all,

Thank you for coming and contributing to a very productive initial meeting of the provisional committee. We almost have all the information needed to submit the nominations soon.

Please see the attached for a revised draft agenda based on the discussions from this morning. Dr. Julius Fajardo was unable to join us today but sent in comments via email, which we have also incorporated. A brief overview of the workshop process and committee vs staff roles from this morning is also attached. We will make the changes to the workshop title and the dates for the first two sessions on our end as well.

Best,
Julie L

Brief recap on discussing the agenda:

- Switch the originally proposed Day 1 and Day 2 sessions in order to start with covering the “big problem” before delving into more specifics. Need to frame the issue and bring together the two sides (plant, human) more clearly at the beginning.
- Start workshop with addressing the need to bridge the gap between the two sides (e.g., common vocabulary, common understanding of problem that each face, establish a shared platform). Start with a history of fungicide development and use.
- Human health is a good entry point to the rest of the discussion, answers the question of why this is important.
- Move solutions (e.g., alternative approaches) to Day 3

Other decisions from the meeting:

- Change title to (1) add “**Plant Agriculture**” and (2) change “Microbe” to “**Fungi**”
- Move first two sessions from Jun 6 and 13 to Jun 21-22; no changes to third session on Jun 27
